

Running R and R-Studio

R language is a free-software for statistical computing. It is widely used software and I have chosen it for this course since it is available for anyone. We are going to use the R-Studio environment to run R. To use it you have two-options:

1. Install R and R-Studio in your computer, or
2. Run R-Studio directly from the web in your browser

Installing R and R-Studio:

1. Go to the R project webpage (<https://cran.r-project.org/>) download and install the specific package (Linux, OS X, or Windows).
2. Go to the R-Studio webpage (<https://rstudio.com/products/rstudio/>) and download the R-Studio Desktop.
3. Start using by running R-Studio in your computer, R will be running automatically in the background.

Running R-Studio directly from the web

1. Go to the R-Studio Cloud webpage (<https://rstudio.cloud/>)
2. Sign-up for a free account.
3. Start using it online.
